## Local Producer's Film to Be Featured at UFO Conference

(Boston - May 26, 2021) Since his days as a 1970's college DJ at Depauw University in Greencastle, Indiana, Jonathan Womack has spent more than 40 years working in the multimedia field. Most of that time has been spent in and around the Boston area, beginning with 1983's ***MusicVision***, a weekly MTV format show with interviews, music videos, and live bands filmed in the studio and the clubs, "for the eyes and ears of New England". The 24-minute pilot, hosted by local radio legend, ***Matt Siegel***, survived the passage of time and technology and can be viewed on the "about" page of the Mind World Entertainment.com website.

More recently, Jonathan spent a decade supporting the media needs of a whose-who of guests at the Harvard Graduate School of Education's *Askwith Forums*. Womack left Harvard in 2015 and launched "Mind World Entertainment" to produce episodic series and stand alone programs with metaphysical themes. Rather than seek out the halls of network execs and cable TV programmers, Womack developed a business model aimed at OTT, or "over the top" streaming

platforms that get their content in front of audiences by going around or “over the top” of networks.

Womack's debut podcast is a 90-minute animated film starring famed ESP researcher and laser physicist, **Dr. Russell Targ** titled, ***Limitless Mind***, which expands and illuminates Targ's 30-minute **TEDX** talk. Targ is co-founder of the renown think-tank, the Stanford Research Institute (SRI), where he conducted remote viewing experiments during the cold war and worked with the CIA's ***Stargate*** psychic spying program. Womack spent five months collaborating with Targ who was closely involved with the production. Numerous Easter eggs are included such as images of Targ's beloved pets, a motorcycle arcade game, a 3D model of a train table that Targ enjoyed as a boy, references to New York City's “Stage Deli” and the Australian locale, “Russell Square”.

“Limitless Mind” premiered on ***Paraflinx*** on March 21, 2021 and will be featured at ***Contact in the Desert***, the world's largest UFO conference, on June 25 through the 28<sup>th</sup>, 2021.

Womack is honored and humbled to work alongside the venerated scientist. “Russell and I poured our hearts into this project and it was worth every effort. He is definitely good for my ego. He loves the final cut as much as I do and I consider that high reward.”

Womack followed up “Limitless Mind” with an episodic series, ***OBE, out of body experience***. Womack is a life-long practitioner of out-of-body travel and has written several “science fiction” novels based on that experience. Womack host the series via a 3D avatar who interviews guests from virtual soundstages

such as a space station, an arcade, a karate studio and a planetarium. “Virtual reality is an excellent tool for expressing abstract ideas and experiences,” says Womack. From time to time Jonathan dedicates entire episodes to animating milestone OBE’s such as “Giants in the Earth”, “The Phantom of Steel” and “The New Brunswick Snake”.

With the looming and much anticipated Department of Defense UFO report, Jonathan is focused on producing content that shines a light on ET’s, Mars, and “our grand, cosmic legacy”. While disclosure may or may not happen anytime soon, Womack remains positive. “It’s going to come out in spite of decades-long efforts by the cabal to keep humans imprisoned on one planet. Let’s brace ourselves and get on with it.”

“Limitless Mind with Russell Targ” and “OBE, out of body experience” can be seen on demand at [Paraflixx.com](http://Paraflixx.com) and at the June 2021 *Contact in the Desert* Conference.
